Your rear seat height can only be between 0 cm and 13 cm below your front seat height:

i.e. rear seat height CANNOT be above front seat height

i.e. rear seat height CANNOT be more than 13 cm below front seat height

- More info, see first back page

# 4" & 5" soft roll and 5" & 6" soft solid are only available with a 45 mm fork

Please note the measurement of seat depth is from the back post

- All measurements are in cm and without a cushion

High frame is 4 cm higher than low frame and you can choose shorter and lighter forks to minimize the weight of your wheelchair. See next page

**Front seat height in cm**

Standard design  
98 mm, 111 mm, 32 mm width

Standard design  
111 mm  
123 mm, 45 mm width

**Please follow measuring method:**

The following method is recommended on the basis of extensive practical experience.

Deviations are possible in individual instances

**Seat width:**

**a) For the user:**

Allow space between side guard and hip on each side of the chair (approx. 1 - 2 cm all together).

**b) On the wheelchair:**

From outside frame tube to outside frame tube

**Seat depth:**

**a) For the user:**

When sitting upright: leave space for 2-3 fingers between front edge of seat upholstery and back of knee (approx. 3-6 cm). Care must be taken with adjustable upholstery.

**b) On the wheelchair:**

From back tube to front of seat upholstery.

**Back height:**

**a) For the user:**

Measured from the seat, including cushion, to be **no more** than one finger (1 - 2 cm) below the lower shoulder blade.

**Important!** The back height depends on the degree of disability.

**b) On the wheelchair:**

From seat tube to upper edge of backrest upholstery.

**Note:** The user's ability to sit upright has a major influence on the back height and it can therefore vary considerably.

**Lower leg length (LLL):**

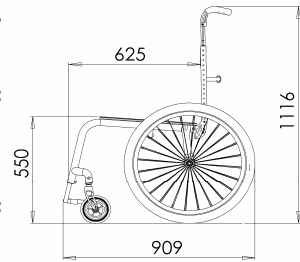

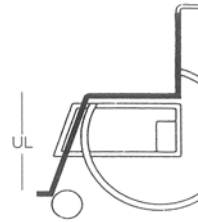

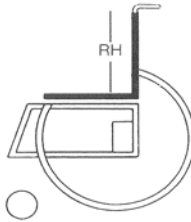

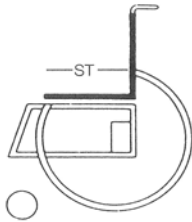

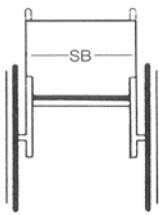

**a) For the user:**

With legs angled at right angles, from back of knee to bottom of shoe sole.

**Remember: to deduct the cushion height when providing the measurement**

**b) On the wheelchair:**

From front of seat to top of footrest.

**Overall width:**

Overall width:  
Max overall height 112cm  
Max overall length 91cm

**Overall width with:**

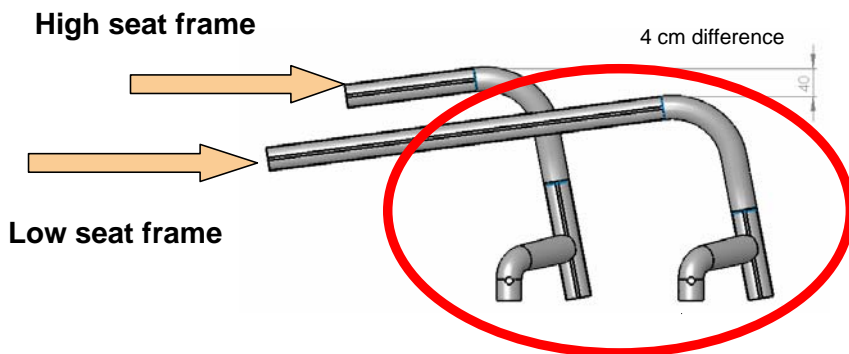

For 0° camber:	24"	SW+20cm	25"	SW+20cm
For 3° camber:		SW+22cm		SW+26cm
For 6° camber:		SW+28cm		SW+32cm

**Weights:**

Minimum weight: each with hand rim distance std from 6.44kg

Please note that the matrix is based on a std configuration  
**Std chair 40 x 40 cm, 3° camber, 5.60 cm CoG**  
**Seat angle of 8°**  
 All changes in the configuration might change the seat heights.  
 Manufacturing tolerances of +/- 1 cm  
**NOTES:**  
 Max seat height difference rear to front is 13 cm.  
 No negative seat angle is possible  
**Please note that the matrix is based on a standard configuration**

**Low seat frame vs. High seat frame**
